I • Inverse Problems

- | | | |
|-----|--|---|
| I.1 | • A. Mandelis, Advances in Lock-in Amplifier Signal Processing Optimization: Signal Noise Ratio, NDE Measurement Methodologies and Case Studies with Thermal Wa
(Keynote lecture)
University of Toronto (Canada) | 1 |
| I.2 | • J. Vos, K. Wapenaar, E. Verschuur, Deconvolution and Multiple Elimination to Enh
Temporal Resolution in Ultrasonic Volume-Scan Measurements
Delft University of Technology (The Netherlands) | 2 |
| I.3 | • P. Lasaygues, JP. Lefebvre, S. Mensah, Deconvolution and Wavelet Analysis
Ultrasonic Reflection Tomography
CNRS - LMA (France) | 3 |
| I.4 | • R.G. Maev, E. YU. Maeva, K.I. Maslov, Ultrasonic Measurements of Thickness of T
Internal Layers of Highly Absorptive Layered Polymer Composite Based on Ti
Domain Inversion Algorithm
University of Windsor (Canada) | 4 |

IA • Inverse Problems in Photo-thermal-Wave NDE

(invited session)

- | | | |
|------|--|---|
| IA.1 | • H.G. Walther, Reconstruction of Thermal Conductivity Depth Profiles fr
Photothermal Measurements
Friedrich-Schiller Universität - Institute für Optik und Quantenelektronik (Germany) | 5 |
| IA.2 | • E. Miller, L. Nicolaides*, A. Mandelis*, Nonlinear Inverse Scattering Methods for Ther
Wave Slice Tomography
Northeastern University (USA), *University of Toronto (Canada) | 6 |
| IA.3 | • J.F. Power, The Source Localisation Inverse Problem and its Application to the De
Profiling of Optical Absorbtion in Thin Films by in Photothermal Measurements
Mcgill University (Canada) | 7 |
| IA.4 | • L. Nicolaides, M. Munidasa, A. Mandelis, Thermal-wave Diffraction Tomograph
Microscopy
University of Toronto (Canada) | 8 |

II • Modelling

- | | | |
|------|--|---|
| II.1 | • C. Bellon, G.-R. Tillack, C. Nockemann, Computer Simulation of Radiographic NDE
Federal Institute for Materials Research and Testing - BAM (Germany) | 9 |
|------|--|---|

II.2	• K.R. Chaplin, S. R. Douglas, D. Dunfort, Detailed Simulation of Ultrasonic Inspections AECL - Atomic Energy of Canada Ltd (Canada)	10
II.3	• M. Faur, J. Oksman*, L. Paradis, Parameter Estimation for Ultrasonic Signal Analysis and Interpretation CEA/CEREM CE-Saclay, *École Supérieure d'Électricité (France)	11
II.4	• B. de Halleux, B. de Limburg Stirum, Precision Measurement of Galvanisation Thickness Applicable On-line to Steel and Derivated Products Université Catholique de Louvain (Belgium)	12
II.5	• M. W. Raad, R.E. Abdel-Aal*, J.M. Noras*, F. Elguibaly**, Novel Digital Pulse Pile-up Identification and Parameter Estimation Algorithms in Nuclear Spectrometry King Fahd University of Petroleum and Minerals (Saudi Arabia), *University of Bradford (UK), **University of Victoria (Canada)	13
III • Information Extraction and Processing		
III.1	• H. Gasquet, Signal Processing for the Extraction of Damping Rates for a Multi-Mode Vibration in Metallic Structures The University of Texas at Austin (USA)	14
III.2	• D.J. Battle, R.P. Harrison, M. Hedley, Entropy-like Regularization Applied to Ultrasonic Non-destructive Evaluation Australian Nuclear Science and Technology Organisation (Australia)	15
III.3	• D. Lévesque, A. Blouin, C. Néron, F. Enguehard, D. Drolet, J.-P. Monchalin, Synthetic Aperture Focusing Technique Data Processing Technique Applied to Laser-Ultrasonics Industrial Materials Institute - National Research Council (Canada)	16
III.4	• B. Wang, J.P. Basart, J.C. Moulder, Nonlinear Image Restoration Methods for Eddy Current NonDestructive Evaluation Center for NDE, Iowa State University (USA)	17
III.5	• H. Licht, L. Pavel, R. Lakhan, Development of Automated Analysis of Eddy Current Signals AECL- Atomic Energy of Canada Ltd (Canada)	18
III.6	• O. Venard*,***, D. Prémel*, A. Mohammad-Djafari**, Eddy Current Tomography: A Bayesian Approach with a Compound Weak Membrane-Beta Prior Model *LESir - ENS Cachan, **LSS Gif sur yvette, ***LSM Noisy le grand (France)	19
III.7	• L. Oukhellou, P. Aknin, Modified Fourier Descriptors: A New Parametrization of Eddy Current Signatures Applied to the Rail Defect Classification Laboratoire des Technologies Nouvelles - Institut National de Recherche sur les Transports et leur Sécurité - (France)	20

III.8	• Th. Benziger, G. Brüggemann, Visualization of Surface Defects Using Acoustic Emission - Data Acquisition and Data Processing Magdeburg University - Institute for Materials Technology and Materials Testing (Germany)	21
III.9	• Y. Largouët, S. Offermann, C. Bissieux, J.L. Beaudoin, Statistical Method applied to Very Low Thermal Signatures in NDT and Thermoelastic Stress Analysis Université de Reims (France)	22
III.10	• A. Braggiotti*, S. Marinetti**, An Adaptive Technique for Background Removal in D2D Consiglio Nazionale delle Ricerche - *LADSEB - **ITEF (Italy)	23
III.11	• A. Bergeron, M. Bruynooghe*, M. Doucet, Optical Correlator for Real-time Industrial Inspection Institut National d'Optique (Canada), *Université Louis-Pasteur de Strasbourg (France)	24
IV • Neural Networks, Artificial Intelligence		
IV.1	• S.-F. Chuang, J.P. Basart, J.C. Moulder, The Application of Wavelets and Fuzzy Logic to Eddy Current Flaw Detection of Steam Generator Tubes Center for NDE, Iowa State University (USA)	25
IV.2	• A. Cichocki, J. Cao, A Self-adaptive Neural Network for On-line Blind Separation of Convolved Sources Laboratory for Open Information Systems, RIKEN (Japan)	26
IV.3	• C. Glorieux, J. Caerels, J. Thoen, A Neural Network Based Method for the in Depth Reconstruction of Material Properties: Theory and Application (invited paper) Katholieke Universiteit Leuven (Belgium)	27
IV.4	• P. Bison, S. Marinetti, G. Manduchi*, E. Grinzato, Improvement of Neural Network Performances in Thermal NDE Consiglio Nazionale delle Ricerche - ITEF, - * IG (Italy)	28
IV.5	• A. Chahbaz, V. Mustafa, D.R. Hay, T. Hay, Ultrasonic Guided Wave System for Fast Assessment of Disbonds in Large Multilayered Structures Tektrend International (Canada)	29
IV.6	• R. M. Palenichka, U. Zscherpel*, Detection of Flaws in Radiographic Images by Hypothesis Generation and Testing Approach Institute of Physics and Mechanics (Ukraine), *Federal Institute for Materials Research and Testing - BAM (Germany)	30

**V • Advances in NDE Techniques, Processing
and Applications**

V.1	• P. Pregowski, Twenty-five Years of Infrared Thermography among other NDE Techniques in Poland (invited paper) PIRS (Poland)	31
V.2	• Z.S.Wu, W.Q. Wu, Ultrasonic NDE in China Nanjing University (China)	32
V.3	• L. Legrandjacques, J.-C. Krapez*, F. Lepoutre*, D. Balageas,* Opening Cracks Detection with a Photothermal Camera (title only) Framatome, Onera Op/L3C (France)	33
V.4	• G. Brüggemann, Th. Benziger, The Combination of Thermography and Image Treatment for Monitoring of and Quality Assurance During Laser-Welding Magdeburg University - Inst. Materials Technology and Materials Testing (Germany)	34
V.5	• C. Muralidhar, K. Srinivasa Reddy, A Study of Delamination in a High Silica Glass Phenolic Cylindrical Liner by Ultrasonic, X-ray Radiography and Thermography Techniques Defence Research and Development Lab. (India)	35
V.6	• F. Chen, Z.S. Wu, X.T. Sun, Pulse-Echo Infrared Thermal Wave Imaging Studies for Multilayered Objects with Defects or Flaws Nanjing University (China)	36
V.7	• J.P. Couturier, X. Maldaque, Pulsed Phase Thermography Applied to the Inspection of Wood Panels Université Laval - Electrical and Computing Eng. Dept. (Canada)	37
V.8	• B. Wiecek, S. Zwolenik, P. Sawicki, Advanced Multichannel Thermal and Visual System Technical University of Lodz, Institute of Electronics (Poland)	38
V.9	• U. Zscherpel, Digital Radiography - State of the Art in Industrial Applications of NDT Federal Institute for Materials Research and Testing - Bam (Germany)	39
V.10	• T. Lüthi, A. Flisch, T. Reimann, Quantitative Nondestructive Measurement of Density Differences in Ceramic Materials using Industrial Computed Tomography Swiss Federal Laboratories for Materials Testing and Research - EMPA (Switzerland)	40
V.11	• J. Rheinländer, Quantitative Condition Monitoring and Data Extraction by Digital Radiography and Phosphore Plate Radiology Materials Res. Dept., Risø National Laboratory (Denmark)	41

V.12	• F. Larachi, J. Chaouki,* Non-Invasive 3-D Radioactive Particle Tracking in Heterogeneous Flows: Principle and Applications Dept. of Chemical Eng. - Université Laval, *École Polytechnique (Canada)	42
V.13	• M. Viens, H. Hébert, C.K. Jen, Ultrasonic Measurement of the Remaining Thickness of Corroded Cast Iron Samples Industrial Materials Institute - National Research Council (Canada)	43
V.14	• X.R. Zhang, Y.K. Zhang, Z.S. Wu, S.Y. Zhang, Elastic Properties Modification in Aluminum Induced by Laser Shock Processing Nanjing University (China)	44
V.15	• R.G. Maev, S.A. Titov*, Measurement Method on Scanning Doppler Continuous Wave Acoustic Microscope The University of Windsor (Canada), *Russian Academy of Sciences (Russia)	45
V.16	• B. Wiecek, P. Sawicki, R. Stein, Directional Emissivity Evaluation in Thermal and Visual Systems Technical University of Lodz, Institute of Electronics (Poland)	46
V.17	• W. Jüptner, W. Osten, S. Seebacher, Measurement of Materials Behavior in Microstructures by Means of Digital Holography (<i>invited paper</i>) Bias-Bremer Institute für Angewandte Strahltechnik (Germany)	47
V.18	• D.S. Forsyth, J.P. Komorowski, A. Marincak, R.W. Gould, Correlation of Enhanced Visual Inspection Image Features with Corrosion Loss Measurements Institute for Aerospace Research - National Research Council (Canada)	48
V.19	• X.T. Sun, Z.S. Wu, Z.Z. Chen, Evaluation of Semiconductors by Acoustoelectric Current Nanjing University (China)	49
V.20	• R. Li Voti, M. Bertolotti, C. Sibilia, Thermal Conductivity and Diffusivity Depth Profiles by Photothermal Technique : The Direct and Inverse Problem Dipartimento di Energetica, Università di Roma "La Sapienza" (Italy)	50
V.21	• J. Rhazi, Y. Kharrat, G. Ballivy, Measurement of Ultrasonic Waves Attenuation in Concrete: The Spectral Ratio Technique Dept. of Civil Eng., Université de Sherbrooke (Canada)	51
